Product Description

Darwin Pro Grip DG00008

The DG PRO is the newest version in the Darwin's Grip Family. It has been re-engineered to have zero slippage and is designed for commercial use. It will allow the operator to fully adjust the X, Y, & Z axis to reach maximum comfort. It combines the benefits of the 5.0 and 6.0's into one unit with a more rugged vise. Darwin's Grip® will allow you to stand up straight to reduce fatigue, and strains and offers precise trimming by getting you closer to the business end of the trimmer.
