Product Description

Oregon 35 Ton Log Splitter, Briggs & Stratton XR1450

The 3500 Series log splitters provide all the power needed to split even the most knotty, stringy hardwoods you can find. Powered by a Briggs & Stratton or Honda engine, you will not be disappointed.

Product Details

- Oregon 35 Ton Log Splitter with Briggs & Stratton XR1450 360cc Engine
 - High-strength Heavy-duty H-beam Design - Robotically welded beam with welded stripper plates and log cradles engineered to handle the high tonnage rates time and time again for years of trouble-free operation.
 - Horizontal & Vertical Operation - Oregon allows flexibility for splitting logs horizontally for an assembly line approach or vertically for thick and heavy logs.
 - Log Catcher Included - All Oregon log splitters include a log catcher for easy horizontal splitting.
 - Optimized Wedge - All Oregon log splitters include an optimized welded wedge with optimal knife edge and separator for efficient splitting.
-
